EDITOR NOTE

We are pleased to bring you the third issue of 2020. Along with few original papers and review papers, for this issue we decided to acknowledge the contributions during this COVID-19 crisis. We would like to appreciate your interest and supports towards the Genetics and Molecular Research. We understand the tough times that everyone is facing during this pandemic, but we assure you that we do our best to provide you the quality review process at a regular pace. With that in mind, we would like to express our sincere thanks to the journal editorial team who evaluate papers, manage the publication process and respond to authors.

Thank you, too, to the editorial board members who have supported the journal since its inception and who continue to promote its growth. And to the reviewers, we appreciate the time you dedicate to ensuring papers meet our standards for scientific quality and integrity. Our journal was founded to help junior researchers and authors from developing countries learn about the rigour involved in preparing a manuscript for publication and in getting published. We remain committed to that objective. As well, we continue to receive more papers from leading researchers from all countries, which is a testament to our commitment to quality.

We look forward to continued success and growth. Consider signing up to be a reviewer or recommending reviewers to us. Submit a paper to the Journal of Spine for publication and recommend the journal to others as a venue for publishing their academic research. If you have any questions, email Genetics and Molecular Research Editor. Wishing you all the best for 2020!.
